## To Belarussian Draughts Federation

Because of my refuse to play in the Belarussian championship which is qualification to the zonal tournament of the World championship I make declaration where explain the reasons of withdrawing from the participation in World and European championships under aegis of the FMJD and the EDC.

I suppose these organizations are criminal and have nothing to do with sport. Some 4-5 persons who never played even on the law level or simply never played are doing all affairs in the FMJD.

The Statutes and the rules do not exist for them. They create idiotic rules contradicting sense and find arbiters from their surround to realize it. So, whom are serving these people calling themselves the FMJD? The answer to this question was demonstrated on the World Team championship in Dakar. The culmination of the championship was the quart-final game A. Georgiev (Russia) - A. Der (Senegal). In the position close to draw the mobile phone of Der registered the receiving of SMS. At this moment all brainlessness of the FMJD and absence of sense, typical for these people authority and demonstration of power towards the weak people was concentrated in the decision of main arbiter.

At the moment when Senegal players showed miraculous steadiness, mastership and in draughts reality won the match , when all Senegal where draughts is the sport number 2 followed this match the main arbiter Demsure (Belgium) took the most idiotic decision in the history of draughts sport and called the game lost for Der. So Senegal was deprived the victory in the match and maybe in the championship.

To understand the idiotism of the decision is good to imagine the background where it was taken.

There were no tournament regulations, multiple phones of supporters ringed, after one of winning games in blitz by E. Prosman ( against Russia ) and Chizhov ( against Senegal ) yelled so hard that

the signal of the phone of Der might be seen as somnifacient. All of it was not interesting for arbiters. Also during the championship in Italy and Dakar the phone signals were not always punished.

The most important is something else. IN the same Dakar the decision has been taken about organization of the match Chizhov - Georgiev in march. That means that the match in Yakutsk for Chizhov who didn't arrive is not declared lost. His title is prolonged for half-year. And in distinction from Der who switched phone signals off Chizhov acted consciously, being in favor by the people who take decisions.

There are many examples when the rules are applying to one players different then to other dependant from closeness to the same 4-5 persons. If to add here that the same 4-5 persons constantly infringe rules and Statutes is clear that draughts inside of the FMJD isn't sport and here is no way for sportive decisions as in the case of Der.

Even clearer answer to the question "Whom is serving the FMJD" comes from the following fact from the same Dakar. In the last letter to national federations the FMJD informed that all players will stay in 5 star hotel «Meridien». In the reality it was else. All non players in the Olympiad ( about 25 persons ) stayed for free and eat in that hotel ( where tournament was played ). They got paradisaical conditions on the ocean coast. The players stayed in totally opposite conditions. The way to the game v.v. together with the waiting time lasted more than 2,5 hours. The lunch was at 1 .00 P.M. and the dinner at 10.00 P.M. the difference in food was more then the difference between 5-star restaurant and Dutch prison ( I read about it ). An organizer informed me that costs for these non-players were higher then costs for all players. Moreover these actors providing themselves paradisaical conditions simply let players play 2 games a day. So the condition for themselves they permanently improving approaching to the paradisaical and the conditions for the players are permanently worsening approaching to hellish. And of course no way to punish themselves for deception of players and federations who spent a lot of money for the travel.

Some of them killed the team of Senegal bringing enormous damage to the draughts sport in this country. Others as Mr. Pawlicky - grey Eminence of the FMJD already some years trying to kill draughts sport in Belarus, the second country in the world after Holland in the level of organization and state support of the draught sport. His constant maniacal desire to equal Belarus in qualification with the countries where draughts sport practically doesn't exist, his actions breaking draughts calender of Belarus bring Belarussian Federation in very difficult situation. And that all is happening because BDF always unmask autocracy and criminal way of doing business by the EDC without bank account ( The criminal way of doing business by the FMJD is a special theme )

Let be just and mention that not only Belarus is suffering. The leaders of France and Ukraine A. Cordier and Y. Anikeev got out of even zonal tournaments and it shows again the killing policy of Pawlicky towards national federation which are the base of the FMJD.

Incompetency of Pawlicky, his constant falsification is not to explain by diletantism only. Just look to his last information about individual results in Dakar. Hi provide it as a private person to popular sites. But everybody knows that he is Vice-President of the FMJD. Pawlicky calculate ratings of Dutch team championship and knows that when the opponents are different the only criteria to compare is average rating of opponents. And so did Pawlicky self during the European championship. To see the falsification of Pawlicky we just compare the result of Buzhinsky (Lithuania) and Mikhalchenko (Belarus). They played against totally different opponents. The average rating of Mikhalchenko's opponents is 61 point higher. It is tremendous difference. And according to Pawlicky version

Buzhinsky scored higher. There is simply one most important criteria - the closeness of players to themselves. Knowing Buzhinsky I'm sure he is not involved in such an actions. But these people are used to have only coefficient of closeness to themselves in everything - drawing lots, inadequate punishing ones and impunity for others, assigning of arbiters who do not know rules, and now also in results.

I want to remind some other idiotic rules created by these 4 - 5 persons from the FMJD:

- 1. It is not allowed to agree draw before 40 moves. (If both players are agree they just make any 40 moves in few minutes and others later look to the games and learn)
- Own rating as criteria for ex-aequo.
- 3. Plus and min as criteria for ex-aequo.(that means you have to play extra hours without knowing you will need it. What the players have to do who knows they will not end high?)
- 4. Additional games for ex-aequo in tournament with Swiss system ( Challenge in Stadskanaal and Yakutsk).
- 5 European championship with knock-our system (it is in draughts equal to play blitz)
- 6. Absurdly forming of groups in all stages of World and European championships according to some secret rules known to these 4-5 persons only (and their close friends). And the drawing of lots is so masterpiece that the hocus-pocus of Copperfield are children tricks when comparing.
- 7. Organization of 20 rounds in the World championship in 17 days, using free day for the round in the Dutch team championship (Amsterdam 2005)
- 8. No show to the match of game brings result equal to victory.

The list may be continued long.

The authors of all of this novelties in a normal sport could earn treatment in a madhouse only. But ours now began to bring order in composition.

That all make constant feeling of being in madhouse. Any illusions that players can change something do not exist anymore for me. Many players have not more dignity and courage than cows who moo when are not glad. And the madhouse is good for the Main Cow.

Therefore I decided to stop participation in the official World and European championship under aegis of the FMJD and the EDC.
